Allowance

1. The following is an examiner's statement of reasons for allowance: claims 1-17 are allowed In view of applicant's amendment of claim 1 and argument (see Remarks page 9, lines 2-12 and 21-22; page 10, lines 8-18). It is agreed that it is unclear how a return line would be coupled with the Oberg's system, GB' 469's continuous loop system discloses fluid flowing from the end of the spray manifolds into the return line to be returned to a single storage tank and GB '469's system circulates liquid of different substances that is already mixed through a continuous loop. As such the combination of Oberg and GB'469 fails to teach applicant's invention. Additionally, It is agreed that prior art of record lacks to teaching or suggesting alone or in combination, a system for coating particulate with at least on fluid comprising among others, a supply line for directing fluid to a nozzle adjacent a mixing tank that is selectively directable through the actuation of valving within a continuous loop of return line. Claims 18-27 are allowed for the reasons stated in the earlier action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
